

Features

The Pivot Gadget provides an advanced reporting tool which allows you to quickly visualize key information tool contained in your JIRA. It provides similar functionality as found in the spreadsheet and business intelligence software. The two dimensional matrix on steroids

It is useful for quickly creating cross tabulations across a long list of dimensions and measurements.

The screenshot shows a JIRA Pivot Gadget interface titled "Pivot using 'Table Grid Editor'". On the left is a "Table Grid Editor" sidebar with a tree view of dimensions: Aggregations, Issue Type (drill-down), Assignee, Reporter, Status, Date Created, Fix Versions, and Epic. Below the sidebar are sections for "Filters" (Epic (drill-down), Issue Type (drill-down)), "Rows" (Fix Versions), and "Measures" (Σ spent). The main area displays a table with the following data:

Epic (drill-down)		Issue Type (drill-down)							
Σ spent		All Issue T...	Bug	Epic	Improvement	New Feature	Question	Supportcase	Task
All Fix Versions		545.42d	169.26d	7.02d	138.44d	67.57d			163.13d
16.80d		3.84d	3.16d	3.31d					6.49d
0.1		0.00d							0.00d
0.2									
0.3		0.00d	0.00d						
0.4		0.31d	0.04d		0.04d				0.23d
0.5		2.13d							2.13d
1.0.1		1.51d			0.16d				1.35d
1.0.2									
1.0		0.15d	0.11d						0.04d
